前言介绍

随着科技的进步和生活水平的提高,人们对服装的要求也越来越高。人们希望服装除了美观时尚，保温保暖外还应具有更多的功能。当具有防水、阻燃、抗菌 和防静电等功能的服装出现后,人们又希望服装能够根据所处环境的改变而发生变化,即实现服装的智能化。智能服装是将来纺织服装业的发展趋势。 智能服装是指模拟生命系统,同时具有感知和反应双重功能的服装。智能服装不仅能感知外部环境或内部状态的变化,而且通过反馈机制,能实时地对这种变化作出反应。感知、反馈和反应是智能服装的三大要素。

2016是智能服装的爆发年，智能服装作为一种新型产业发展已经势不可挡。随着科技的发展,服装已突破了原有的保温和美化的范畴,正在走向功能化与智能化。智能服装是继功能服装之后出现的又一高科技服装,它将在改善人们的劳动条件和提高人们的生活质量方面发挥重要作用。智能服装的出现是人类服装史上的一次革命性变化,它的出现对纺织服装业的发展有重大意义,并将产生深远的影响。

为促进智能服装产业的快速发展，推动传统纺织服装行业改造和升级，宁波国际智能服装产业大会将于2021年06月25-36日在宁波召开。大会将给广大智能服装爱好者，智能服装品牌，智能生产技术硬件及设备，高新材料企业，贸易商等搭建一个投资洽谈，交流合作及贸易的平台。

PREFACE

With the development of science and people's living standards, the requirements of the clothing' function is also increasing. It is hoped that clothing should have more features in addition to fashion and warmth. Nowadays we already have the clothing having the functions including waterproof, ame retardant, anti-bacterial and anti-static, and people hope the clothing could be able to vary depending on the changing environment, namely to achieve smart clothing. Smart clothing is the future of textile and garment industry. Smart clothing refers to the life simulation system, having the dual function of perception and reaction. The garments could not only to perceive changes of the external environment and internal state, but also to make smart feedback and respond to this change in real time. Perception, feedback and reaction are the three elements of smart garments.

2016 is the time of outbreak of smart clothing, the development of smart clothing has been unstoppable. With the development of science and technology, the clothing has exceeded the original scope of the warmth and fashion, is moving towards functional and intelligent. Smart clothing is the upgrade of functional clothing and will play an important role in improving people's working conditions and improving the quality of life aspects. Smart clothing is the emergence of a revolutionary change in the history of human clothing.

To promote the rapid development of smart clothing industries, to promote the traditional textile and garment industry transformation and upgrading, Ningbo International Smart Garments Industry Conference will be held in Shenzhen on June 25-26, 2021. The conference will build a platform for smart clothing lovers, smart clothing brands, smart production technology hardware and equipment, high-tech materials and traders to communication and cooperation.
